OVERVIEW

Appetizers play an important part of a man's meal. The word itself gives its natural meaning. "Appetizer" stimulates the sensory sense which is the sense of taste. It was originally introduced by the Athenians as a buffet in the early 3rd century B.C. However, they were unpopular to start as these tiny meals weren't followed up with a main course. It was in the 19th century that appetizers truly caught on.

Aperitifs came about by the Romans and were classified as a liquid appetizer that typically contained alcohol. The word itself "appetizer" starts being used in America and England in the 1860s, though it's only reason for existence was to have a word with more of a local flavor than "hors d'oeuvres."

On the other hand it is said that appetizers are the dishes that can truly be considered Filipino because we are best known for using our hands to eat the small finger foods that cone with the first course. They are often served before dinner or at large family lunches.

This lesson deals with different classifications of appetizers and its type, and performed simple localize appetizer recipe.
